

Geo - Environmental Engineer

An exciting opportunity has arisen to join our VHE team as a Geo-Environmental Engineer.

This is a great opportunity for an experienced Geo-Environmental Engineer to join our team working on a variety of land and remediation projects.

Key Responsibilities:

- On site chemical and geotechnical sampling, scheduling for laboratory analysis- and interpretation of results.
- Site Investigation works including logging of data to British Standards
- Assist in technical review of tender documentation, data assessment, interpretation and evaluation of chemical and geotechnical data.
- Implementation and management of environmental monitoring on sites including noise, odour, vibration and dust assessments.
- Production of factual geo-environmental and verification reports.
- Undertaking geotechnical analysis and trials on site and within in-house laboratory.
- Liaising and working with the Clients team.
- Working with project delivery teams.
- Waste Classification in accordance with industry standards and guidance.

Qualifications and Experience:

- A BSc (or higher) in Geology, Environmental Geoscience, Environmental Science or similar
- Minimum of 4 – 5 years experience in the ground remediation and/or land contamination industry
- Able to work on own initiative;
- Attention to detail and accuracy;
- Ability to work well both independently and within a team environment;
- Proficiency in the use of Microsoft Office (e.g. Excel, Word);
- Good time management and organizational skills;
- Willingness to learn a diverse range of skills and undertake training courses;
- Excellent communication skills both written and verbal.
- Willingness to travel throughout the UK; and work away from home when required
- CSCS Card
- Full UK driving licence
